EDUCATION

Florida State University | Tallahassee, FL

May 2024

Bachelor of Science in Computer Science, Minor in Mathematics and Physical Sciences

Cumulative GPA: 3.806

Related Coursework: Data Structures & Algorithms, Full-Stack Application Development in C#

TECHNICAL SKILLS

Languages & Frameworks: C++, C#, HTML5, CSS3, JavaScript, Bootstrap, jQuery, .NET

Technologies: Unix, Git, Google Cloud, CMake, PuTTY, UWP

PROJECTS

Canvas UWP Remake | C#, .NET, UWP

Jan. 2023 – May 2023

- Developed a comprehensive learning management portal based on Canvas using C#, .NET, and UWP.
- Implemented a range of features and functionalities to enhance the learning experience, including course management, assignment submission, and grading systems.
- Created interactive dashboards and reports to enable instructors and teaching assistants to track student progress and performance effectively.

NotiLinker Discord Bot | Discord.js, Google Cloud

Aug. 2019 – June 2021

- Created an email scraping application in JavaScript that was then hosted on a virtual machine in Google Cloud.
- Scheduled hourly RegEx and Gmail queries to run through Gmail API and return queried emails from 5 platforms as a formatted Discord message using webhooks.
- Assigned 50+ students to their respective teachers so that they are notified of an incoming message for their classes.

CERTIFICATIONS

- Certified SOLIDWORKS Associate – Mechanical Design Certification 2021
- techLaunch.io Certificate of Completion: Gaming and Web Development 2020
- Certified Internet Web Site Development Associate Certification 2020
- Adobe Certified Associate: Web Authoring using Adobe Dreamweaver CC 2015 2019

EXPERIENCE

Customer Success Intern | Caribe Automotive | North Miami, FL

July 2021 – Aug. 2021

- Managed an online database while recording customer data such as address, repair request, parts required, and price on paper and the database.
- Filed and organized receipts, customer data, and warranties in 2 separate offices.
- Performed repairs with mechanics such as oil change, replacing air filters, and changing a car battery.

Web Development Intern | techLaunch | North Miami, FL

June 2020 – July 2020

- Programmed games such as a highway car dodging web-based game using a wave-generated system that kept track of scores for every player based on name.
- Competed in tournaments for our games and then gained feedback and time to revise.
- Languages: HTML5, CSS3, JavaScript
